

**LABORATORY TEST REPORT**

|                    |                                      |               |                        |
|--------------------|--------------------------------------|---------------|------------------------|
| Name               | : Master. K CHARAN KARTHIK           |               |                        |
| Sample ID          | : A0787351                           |               |                        |
| Age/Gender         | : 13 Years/Male                      | Reg. No       | : 0312409260041        |
| Referred by        | : Dr. SELF                           | SPP Code      | : SPL-CV-172           |
| Referring Customer | : V CARE MEDICAL DIAGNOSTICS         | Collected On  | : 26-Sep-2024 03:53 PM |
| Primary Sample     | : Whole Blood                        | Received On   | : 26-Sep-2024 04:30 PM |
| Sample Tested In   | : Whole Blood EDTA                   | Reported On   | : 26-Sep-2024 06:32 PM |
| Client Address     | : Kimtee colony ,Gokul Nagar,Tarnaka | Report Status | : Final Report         |

**HAEMATOLOGY**

| Test Name                                                             | Results  | Units | Biological Reference Interval |
|-----------------------------------------------------------------------|----------|-------|-------------------------------|
| Blood Grouping (A B O)<br><small>(Method: Tube Agglutination)</small> | O        |       |                               |
| Rh Typing<br><small>(Method: Tube Agglutination)</small>              | Positive |       |                               |

**Comments:**

Blood group ABO & Rh test identifies your blood group & type of Rh factor. There are four major blood groups- A, B, AB, and O. It is important to know your blood group as you may need a transfusion of blood or blood components; you may want to donate your blood ; before or during a woman's pregnancy to determine the risk of Rh mismatch with the fetus.

**Note:** Both Forward and Reverse Grouping Performed .
