

**LABORATORY TEST REPORT**

Name	: Mrs. KRANTI		
Sample ID	: A1841898		
Age/Gender	: 48 Years/Female	Reg. No	: 0312503140009
Referred by	: Dr. SELF	SPP Code	: SPL-CV-172
Referring Customer	: V CARE MEDICAL DIAGNOSTICS	Collected On	: 14-Mar-2025 08:26 AM
Primary Sample	: Whole Blood	Received On	: 14-Mar-2025 12:43 PM
Sample Tested In	: Citrated Plasma	Reported On	: 14-Mar-2025 02:20 PM
Client Address	: Kimtee colony ,Gokul Nagar,Tarnaka	Report Status	: Final Report

**CLINICAL BIOCHEMISTRY**

Test Name	Results	Units	Biological Reference Interval
D - DIMER, QUANTITATIVE <small>(Method: Up-converting Phosphor Technology)</small>	262.1	ng/mL	< 500

**Interpretation:**

D-dimer assay is intended for use in conjunction with a nonhigh clinical pretest probability (PTP) assessment model to exclude deep vein thrombosis (DVT) and pulmonary embolism (PE). This test can be used to exclude venous thromboembolism with nonhigh pretest probability (ie, low or low/moderate pretest probability). In an exclusion strategy, a D-dimer below the established threshold in a nonhigh pretest probability patient does not require further testing to exclude venous thromboembolism.
