LABORATORY TEST REPORT

Name : Mr. ASHOK Sample ID : A1841958

: 44 Years/Male Reg. No : 0312503160006

Collected On

Referred by : Dr. PRABHUDHEER B SPP Code : SPL-CV-172

Primary Sample : Whole Blood Received On : 16-Mar-2025 02:42 PM Sample Tested In : Serum Reported On : 16-Mar-2025 04:31 PM

Client Address : Kimtee colony ,Gokul Nagar,Tarnaka Report Status : Final Report

CLINICAL BIOCHEMISTRY				
Test Name	Results	Units	Biological Reference Interval	
Uric Acid	6.6	mg/dL	3.5-7.2	

Interpretation:

Age/Gender

Referring Customer

- Uric acid is a chemical created when the body breaks down substances called purines. Purines are normally produced in the body and are also found in some foods and drinks. Foods with high content of purines include liver, anchovies, mackerel, dried beans and peas, and beer. Most uric acid dissolves in blood and travels to the kidneys. From there, it passes out in urine. If your body produces too much uric acid or does not remove enough if it, you can get sick. A high level of uric acid in the blood is called hyperuricemia. This test checks to see how much uric acid you have in your blood. Investigation and monitoring of inflammatory arthritis pain, particularly in big toe (gout)
- Useful in the investigation of kidney stones
- Aid in diagnosis, treatment, and monitoring of renal failure/disease
- Monitor patients receiving cytotoxic drugs (high nucleic acid turnover)
- Monitor diseases with nucleic acid metabolism and turnover (eg, leukemia, lymphoma, polycythemia)
