

LABORATORY TEST REPORT

Name	: Baby. LOUKYA	Reg. No	: 0312505010041
Sample ID	: B2623165	SPP Code	: SPL-CV-172
Age/Gender	: 6 Months 19 Days/Female	Collected On	: 01-May-2025 09:13 PM
Referred by	: Dr. SELF	Received On	: 01-May-2025 10:22 PM
Referring Customer	: V CARE MEDICAL DIAGNOSTICS	Reported On	: 02-May-2025 12:46 AM
Primary Sample	: Whole Blood	Report Status	: Final Report
Sample Tested In	: Serum		
Client Address	: Kimtee colony ,Gokul Nagar,Tarnaka		

IMMUNOLOGY & SEROLOGY

Test Name	Results	Units	Biological Reference Interval
HIV (1 & 2) Antibody (Method: ELISA)	0.37	S/Co	< 1.00 : Negative > 1.00 : Positive

Interpretation

- Non Reactive result implies that antibodies to HIV 1 / 2 have not been detected in the sample. This means the patient has either not been exposed to HIV 1 / 2 infection or the sample has been tested during the "window phase" i.e. before the development of detectable levels of antibodies. Hence a Non Reactive result does not exclude the possibility of exposure or infection with HIV 1 / 2.
- Pre and Post test counseling to be done by the concerned referring doctor. The sensitivity and specificity of this test has been determined by National HIV Reference Centers of Govt. of India and WHO collaborating Centers, using various other test panels. "
- Reactive samples by ELISA Method are confirmed by 2 other supplemental tests for confirm of HIV infection as per NACO guidelines.
- All patients' reports indeterminate should be repeated with a second sample taken 14-28 days. In case the serological results continue to be indeterminate the sample should be subject to western blot for confirmation.
